

INTRODUCING JET Charge Assist

Your expert partner for safe,
affordable & reliable EV operations

Maximize Charger Uptime

Reduce outages and ensure reliable charging for drivers and customers.

Ensure Safety

Avoid the worst with regular checks and repairs for compliance and warranty needs.

Use the Right Tool for the Job

Get support from EV charging specialists who understand the demands of advanced fleet operations.

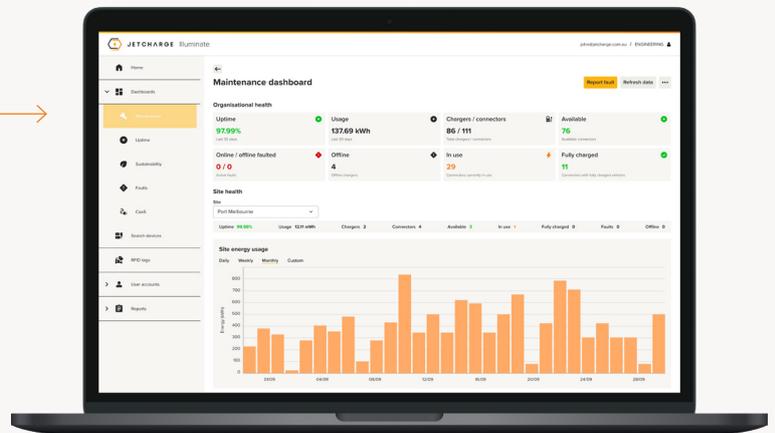

Protect Your Customer Experience

Partner with a trusted provider offering fast service response times.

JET Charge Assist offers tailored maintenance plans from self-service to full asset management. Each plan includes:

- » Dedicated EV charging asset management platform
- » Comprehensive customer support framework
- » Scheduled maintenance option
- » Proactive troubleshooting
- » Remote and onsite repairs
- » Support by our team of EV charging experts

Comprehensive EV charging management

Illuminate - our EV charging asset management platform - reflects a decade of experience supporting chargers in a range of operating environments. It offers intuitive, powerful monitoring for everything from individual chargers to entire networks.

Check charger status, receive targeted fault alerts when appropriate, remotely diagnose and repair issues, access crucial performance data like uptime, service history, energy usage and emissions impacts, understand what your infrastructure costs to operate and when it might need replacing.

24/7 Help Centre here for you

Our Customer Care team is ready to respond at any time of the day or night, with industry-leading expertise, remote troubleshooting capability and national field services support.

National field services network

Count on rapid response and minimal downtime with our nationwide network of experts, extensive spare parts inventory and efficient supply-chain.
