

Australia's Longest Electric Vehicle Highway is a go!

(Perth, Australia, 10 August 2022) JET Charge is thrilled to have been announced as the charging hardware solution provider for the longest EV highway in Australia. The project is set to extend for more than 5,300 kilometers across Western Australia.

Synergy and Horizon Power are working with the State Government to create Australia's longest EV charging network. This project is part of the McGowan Government's \$43.5 million Electric Vehicle Fund and delivers on the State Electric Vehicle Action Plan for Western Australia.

This project will see a range of electric vehicle chargers installed at locations across WA, from Kununurra in the north to Esperance in the south, and Eucla in the east. Upon its completion, EV drivers will have access to 98 EV chargers spread across 49 locations along major transport routes, ensuring EV owners can explore the state with the confidence that a charger is just down the road.

The project will also see the installment of both AC and rapid DC charging stations up to 150kW including a high proportion of Australian Made technology and innovation.

Synergy and Horizon Power are pleased to work with JET Charge, Australia's largest electric vehicle charging infrastructure specialist, to deliver chargers for Western Australia's EV fast charging network. JET Charge's expertise will ensure Synergy and Horizon Power provide Western Australians the ability, comfort, and certainty to access fast charging facilities at 49 locations across the state. – Joint Statement from Synergy and Horizon Power

"We started JET Charge almost a decade ago to accelerate the transition to low emissions vehicles in Australia by breaking down the barriers to EV charging. JET Charge are so proud to be involved with a landmark EV charging network that features a lot of Australian made innovation, and will absolutely smash those barriers allowing people to drive EV's all over the great State of Western Australia". – Tim Washington, CEO JET Charge.

About JET Charge

JET Charge is Australia's leading electric vehicle charging infrastructure business, on a mission to accelerate the uptake of EVs by breaking down the barriers to EV charging. They are charging partners for many of Australia's largest vehicle manufacturers, leading corporates, and government agencies. JET Charge specialises in EV charging engineering, hardware supply, electrical installation, and maintenance, as well as EV charging grid integration services.

About Synergy

Synergy is proud to be Western Australia's largest electricity generator and energy retailer, working together with our more-than one million household and business customers towards an intelligent energy future of reliable, low-emission power at the lowest sustainable cost.

For more information, visit <https://www.synergy.net.au>

About Horizon Power

As Western Australia's regional energy provider, Horizon Power is committed to delivering sustainable, innovative, and affordable energy solutions to regional and remote communities across the state.

Horizon Power is at the forefront of the energy transition, delivering energy solutions for regional and remote communities including batteries, solar, green hydrogen, electric vehicle charging infrastructure, DER management, and virtual power plants.

As Australia's only vertically integrated electricity utility, Horizon Power operates across the full energy supply chain: generation, transmission, distribution, and retail services.

Our service area is the largest geographical catchment of any Australian energy provider. We manage the North West Interconnected System (NWIS) in the Pilbara; the connected network covering three interconnected systems in Kununurra, Wyndham and Lake Argyle; and 34 microgrids tailored to meet the unique needs of some of the most isolated and remote communities in the world.
